

The image contains two diagrams illustrating the flow of information in a neural network. The left diagram shows a path from input to output, and the right diagram shows a path from output to input.

A diagram showing a piecewise linear path with three segments and four vertices. The path starts at a black dot on the left, goes right to a second black dot, then up and right to a third black dot, and finally up to a fourth black dot. The segments are colored blue, gray, and blue respectively. Arrows on the blue segments indicate the direction of the path.
